

Wowed

Create beautiful word clouds on your iPhone

Review Guide

deftmethods

Wowed

Wowed brings beautiful word clouds to iPhone. It allows you to easily create word clouds from Twitter, Facebook, webpages, text on the clipboard, and your own data. It also includes a share extension to create a word cloud from a webpage in just a couple of taps. Once created, word clouds can be styled using different layouts, colours, and fonts, and can be shared as an image or PDF.

What's new in 1.1

Facebook

Log in with Facebook and create word clouds from your status updates and their comments.

Twitter

Create word clouds from the bios of your followers and accounts that you are following.

Sharing

Make it clear what your word cloud's about by optionally including its title when sharing it as an image or PDF.

More languages

Make your word clouds more interesting by automatically removing common, uninteresting words from 14 new languages. Previously, only English was supported. The new languages are Brazilian Portuguese, Czech, Danish, Dutch, Finnish, French, German, Italian, Norwegian, Polish, Portuguese, Romanian, Spanish, and Swedish.

Standard features (free download)

- Create word clouds from Twitter, Facebook, webpages, the clipboard, and your own data
- Use the share extension to quickly create word clouds from webpages
- Style word clouds with:
 - Three different fonts
 - 9 different colors
 - Perpendicular layout
- Share word clouds as small (1024px) images

Premium features (in-app purchase required)

- Style word clouds with:
 - 19 more fonts
 - 13 more colors and themes
 - 5 more layouts: Horizontal, Herringbone, Swaying, Rocking, and Wild
- Share word clouds as large (5120px) images, and PDFs

If you would like to try Wowed's premium features, please contact Andy Wilkinson (andy@deftmethods.com) to be added to the current beta on TestFlight.

Pricing

Wowed is available as a free download with a single in-app purchase for \$2.99 to unlock all of its premium features.

Requirements

iPhone

iOS 8
